Advice to Doctor

Treat symptomatically.

Other Information

Use good occupational work practice.

5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media

Use water fog, foam, dry chemical or carbon dioxide for surrounding fires as governed by adjacent materials.

Specific Hazards Arising From The Chemical

No unusual fire or explosion hazards.

Non combustible.

6. ACCIDENTAL RELEASE MEASURES

Spills & Disposal

Slippery when spilt. Avoid accidents, clean up immediately.

In event of large spill:

Use absorbent (soil or sand, sawdust, inert material, vermiculite).

Sweep up.

Collect and seal in properly labelled drums for disposal.

Contain using sand and earth - prevent runoff into drains and waterways.

Wash area down with excess water.

7. HANDLING AND STORAGE

Precautions for Safe Handling

Always wash hands before smoking, eating, drinking or using the toilet.

Use in a well ventilated area. Ensure the appropriate personal protective equipment is used when handling this material if required.

Use safe workplace practices and avoid contaminating waterways.

Conditions for safe storage, including any incompatibilities

Store in plastic containers in a clean, dry, cool, well ventilated place away from foodstuffs. Keep containers closed when not in use.

11. TOXICOLOGICAL INFORMATION

Ingestion

Mildly irritating. LD50 (rat) 1200 mg/kg for the quaternary ammonium compound used in this product.

Inhalation

Not normally an irritant, however spray mists may irritate the nose, throat and respiratory tract.

Skin

Repeated or prolonged skin contact may lead to de-fatting of the skin, which can lead to the onset of dermatitis.

Eye

Irritant. May cause stinging, watering, redness and irritation.

Chronic Effects

Repeated or prolonged skin contact may lead to de-fatting of the skin, which can lead to the onset of dermatitis.

12. ECOLOGICAL INFORMATION

Short Summary of Assessment of Environmental Impact

The surfactant contained in this product is readily biodegradable, but is regarded as toxic to aquatic organisms. OECD 302B testing of the quaternary ammonium compound contained in this product indicates that it is readily biodegraded, but it is also regarded as toxic to aquatic organisms. Therefore, the undiluted product should be prevented from entering waterways. If possible, the expended material should be drained to the sewer as sewerage treatment will greatly reduce damage to water quality.

Whilst the aquatic toxicity of the components is relatively high (96 hour maximum safe concentration in the order of 1-5 mg/L), dilution of the product with the large excesses of water present and the relatively rapid biodegradation of the surfactants and quaternary ammonium compound should ensure minimal ecotoxicity.

13. DISPOSAL CONSIDERATIONS

Waste Disposal

Dispose of large amounts in a chemical dump according to local authority statutory requirements. For small quantities, flush with copious amounts of water to the effluent system.

Container Disposal

Rinse out container with water and dispose in plastics recycling bin.
